Capabilities

Abby Industrial delivers entrepreneurial and creative approaches to complex, multi-million industrial construction projects. With experience spanning multiple countries, industries and project types, the company has established a reputation for managing high-profile industrial and commercial projects. From public to private, Abby Industrial has managed construction and capital equipment installation projects in the tens of millions of dollars – with milestones delivered on time and within budget.

Project List

- Office and commercial buildings, industrial shops, and field installations.
- Process treatments for air and water, storm water, and waste water.
- Industrial processing, shredding, grinding, crushing.
- Procurement of industrial equipment: Specification, acquisition, design review, quality control, delivery, and start-up.
- Scrap metal recycling, end-of-life vehicles, asset recovery.

We work with clients, design, and process professionals to deliver solutions or oversight for your upgrade, expansion, or improvement. Our installations are built for the long haul, with operability, maintenance, lifecycle costs – and most importantly – profitability in mind.
