

OWNER'S PROJECT MANAGER · INDUSTRIAL CONSTRUCTION · EQUIPMENT PROCUREMENT

1 New Hampshire Ave, Ste. 125, Portsmouth, NH 03801

CAPABILITIES STATEMENT

MULTI-MILLION DOLLAR INDUSTRIAL PROJECTS

CAPABILITIES

Abby Industrial, an SDVOSB-certified firm, delivers Owner's Project Manager (OPM) and General Contracting services for heavy-duty industrial applications. We manage multi-million dollar projects for recycling plants, metal processing lines, port facilities, asset recovery, and demolition – on time, on budget, and built to last. Our projects span multiple countries and technology providers, and we are known for executing complex industrial builds around live operational constraints. From public to private sector, Abby Industrial brings 34 years of hands-on construction and capital equipment expertise to every engagement – with operability, maintenance, and lifecycle costs designed in from day one.

CORE SERVICES

- Owner-side construction management – integrating engineers, machinery, building trades, people, and property into productive assets.
- Air, water, stormwater, and wastewater process treatment systems
- Industrial processing facilities: scrap metal shredding, metal recovery, and full plant build-out
- Capital equipment procurement: specification, acquisition, design review, quality control, delivery, and start-up
- Scrap metal recycling, plant demolition, and asset recovery

DIFFERENTIATORS

- 34 years of industrial construction expertise** spanning shipbuilding, mining, demolition, metal recycling plant construction, shredding line commissioning, port facilities, and environmental compliance
- Full project lifecycle management** – from concept and equipment specification through commissioning and start-up, with throughput, uptime, and plant profitability built in
- Worldwide equipment procurement** – specification, design integration, contract negotiation, submittals, delivery, and start-up across global technology providers
- Operational constraint management** – proven track record executing complex capital projects in live, running facilities without disrupting production
